

It's not enough to refer to yourself as "green". You've got to make the list.

When it comes to design and construction, it's all about life-cycle thinking and creating high-performing, healthy buildings that have the lowest possible environmental impact. Green Spec is constantly raising the bar and Griddd is consistently making the grade.

- Griddd is permitted to be installed with non-plenum rated cabling. Unlike the competition, Griddd keeps the toxins found on the sheathing of plenum-rated cabling out of the food chain.
- Griddd provides re-use capability to allow older buildings to meet current and future technology and connectivity requirements for the modern technology environment.
- Griddd is fabricated with recycled steel, and is 100% recyclable and reusable.
- Griddd is refundable via a 10 Year Buy-Back Program.

What makes this product green:

- Non plenum-rated cable permitted
- Reduces renovation impact
- Post-industrial recycled material
- Locally harvested raw material and US Manufactured Steel
- Manufactured in USA

Griddd Buy-Back Program

For a period of up to 10 years, FreeAxex will buy back material from the original purchasing entity.
